

Define Problem Statements

VANGUARD CREDIT AUTOMATION | ACADEMIC PROJECT TRACK DELIVERABLE

1. Core Problem Statement

Financial institutions require a reliable, high-throughput automated approval engine to predict creditworthiness, flag compliance anomalies, and guide consumer eligibility checks.

2. Sub-Problem Definitions

- Scenario 1 (Credit Application Screening): Overwhelmed credit analysts require a predictive scorecard to evaluate applications instantly without backlogs.
- Scenario 2 (Compliance Screening): Banks must automatically audit portfolios and block delinquency risks (overdue loan accounts) in real time.
- Scenario 4 (Consumer Eligibility Portal): Prospective cardholders need a soft-check eligibility wizard that yields approval feedback and credit improvement tips without damaging their credit scores.
