

Problem-Solution Fit Matrix

VANGUARD CREDIT AUTOMATION | ACADEMIC PROJECT TRACK DELIVERABLE

1. Operational Backlog

Problem: Analysts take hours review applicant sheets manually.

Solution Fit: Flask backend scores entries instantly (<200ms) with key decision labels.

2. Default & Delinquency Risks

Problem: Compliance violations from approving past-due delinquents.

Solution Fit: Feature engineering pipeline auto-flags status codes 1-5 to binary High_Risk labels and overrides approvals.

3. Customer Inquiry Score Drops

Problem: Customer credit scores drop from hard inquiries during checks.

Solution Fit: Pre-qualification check wizard simulates soft inquiries without reporting to credit bureaus.
