Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Discovery & Soft Check	Stage 2 Analyst Evaluation	Stage 3 Compliance Audit
Actions <i>What does the customer do?</i>	• Navigates to online banking pre-qualification wizard. • Reviews credit card options and benefits. • Submits profile details (Income, Job Tenure, DTI) to query pre-approval odds.	• Risk Analyst logs into the Analyst Console. • Submits candidate details or pre-fills standard applicant sample data. • Scores profile through active accuracy model.	• Compliance Officer uploads applicant portfolio list CSV sheets. • Runs automated compliance batch audits. • Automatically flags past-due delinquencies.
Touchpoint <i>What part of the service do they interact with?</i>	• Pre-qualification Eligibility wizard landing page. • Progress stepper and form slider synchronizers. • Soft check query indicator widget.	• Analyst Form parameter controls. • Real-time score indicator dashboard dial. • Positive/Negative feature contributions list.	• Compliance Audit dashboard interface. • Drag-and-drop batch CSV upload area. • Delinquent warning labels and ledger lists.
Customer Thought <i>What is the customer thinking?</i>	• 'Will checking this damage my credit score history?' • 'Are these card options suited to my credit profile?' • 'Is this form secure and easy to complete?'	• 'Does this profile align with standard approval requirements?' • 'What are the main risk factors highlighted by the ML engine?' • 'Can I justify this underwriting decision to regulators?'	• 'Are we approving delinquent accounts that introduce bad debt?' • 'How do we automatically flag status codes 1-5?' • 'Does this audit log fulfill banking standards?'
Customer Feeling <i>What is the customer feeling?</i>	• Anxious about score drops and hard pull penalties. • Helpful progress indicators bring confidence. • Hopeful about pre-approval feedback.	• SLA time constraints pressure analysts. • Reassured by model statistical comparison outputs. • Confident when utilizing explainable AI indicators.	• Alert to delinquency risk anomalies. • Reassured by automated rule override filters. • Safe knowing portfolio default rates are controlled.

Phase of Journey	Stage 1 Discovery & Soft Check	Stage 2 Analyst Evaluation	Stage 3 Compliance Audit
Process Ownership <i>Who is in the lead on this?</i>	• Frontend UI Developer / Marketing Web Layer	• Credit Risk Analyst / Backend Application Layer	• Portfolio Compliance Auditor / Database Layer
Opportunities <i>How can we improve this stage?</i>	• Provide clear consumer disclaimers regarding soft inquiry pulls. • Auto-populate profile details from customer accounts if logged in. • Sync ranges directly to visual sliders.	• Integrate real-time explainable risk contributions dynamically. • Maintain session-persistent Evaluation History Log tables. • Build sample applicant pre-fill templates for risk testing.	• Auto-map delinquency status codes (1-5) to binary flags. • Detail code translations (C, X, O, 1-5) directly in compliance portals. • Export compliance records to CSV sheets.
